2023 STATE OCCUPATIONAL LICENSING INDEX: REGIONAL MAP	14
2023 STATE OCCUPATIONAL LICENSING INDEX: STATES A-Z	15
APPENDIX	66
ENDNOTES	68

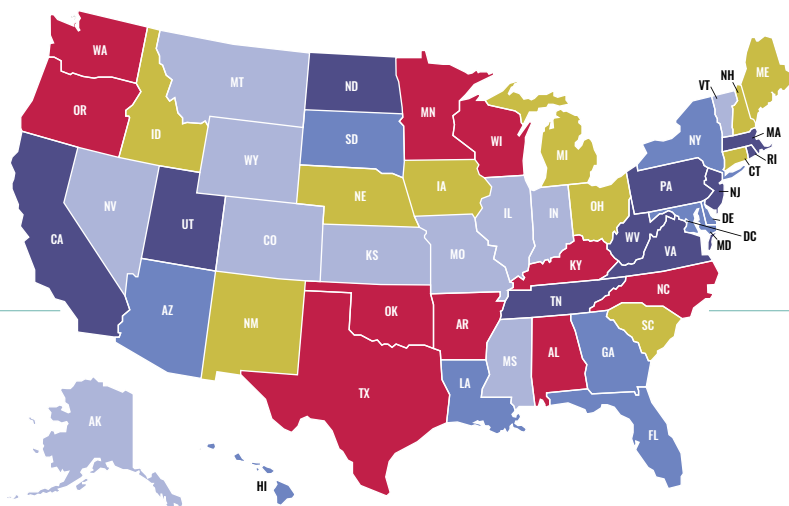

INTRODUCTION

Occupational licensing affects more than 20% of workers in the United States.¹ The extent of occupational licensing greatly differs across states. From both a research and public policy standpoint, it is important to have a comprehensive measure of occupational licensure across states and occupations.

The purpose of the State Occupational Licensing Index (SOLI) is to help fill in this gap. Existing indexes have made important contributions to measuring occupational licensing. The Institute for Justice released three reports measuring the burden of occupational licensing for select low- and middle-income occupations in 2012, 2017, and 2022.² The Cato Institute also published an annual index of occupational licensing with coverage of 64 licensed occupations and additional measures of restrictions.³ Teague (2016) also published a study that includes counts of licensed occupations and agencies as a component of a “Barriers to Entry” index that to the best of our knowledge has not been updated since publication.⁴ The National Conference of State Legislatures (NCSL) also provides The National Occupational Licensing Database, which consists of 48 commonly licensed occupations.⁵

Our goal for this index is to add to this small but growing literature and provide an additional state level index that will be useful to both researchers and the public policy community.

METHODOLOGY

The data for SOLI is obtained from the Occupational Regulation Database hosted by the Knee Center for the Study of Occupational Regulation.⁶ The database contains information on 345 commonly regulated occupational titles, across 155 different Standard Occupation Classification (SOC) codes. The objective of the Knee Center Database is to provide as comprehensive of a list of licensed occupations as possible for researchers, policymakers, and individuals interested in understanding occupational licensing requirements across the U.S.

From the database, these 345 occupations were checked for incongruences on the definition of licensing, as some states use terms such as “certification” or “registration,” contrary to the formal economics definition of licensing.⁷ Using this basic framework, licensing is defined as making it illegal to perform a job without meeting minimum entry requirements set by the state. Certification protects titles, and registration creates a list of professionals. Certification and registration are much less burdensome to individuals practicing a profession. For this reason, certification and registration are not included in our index. A unique contribution of our index is that each occupation title was checked to see if that occupational title was barred by a license under another title.

For example, in the state of Alabama, all acupuncturists are required to be licensed physicians; thus, while the occupational title of “Acupuncturist” is not licensed, that occupation is barred by a license in some way. Another example is “Shampooer.” In several states shampooers must obtain cosmetology licenses to work. Other states exempt the profession while still others issue separate shampooer licenses. Of the 345 occupations, 12 were not barred or licensed in any state; additionally two were dropped due to redundancy, leaving 331 occupation titles with formal barriers to entry. **Table 1** lists the occupations included in the Knee Center Database and their total barriers and total licenses.

In our index, we define a barrier to mean that the tasks associated with an occupational title are restricted by an occupational license. A license is an explicit license for that occupational title. For the state of Alabama, “Acupuncturist” has a barrier—a physician license, but no explicit “Acupuncturist” license. If the SOLI index were calculated with physicians and acupuncturists only, Alabama would have a barriers count of two and a licenses count of one. A licensing requirement is anything beyond a registration fee that is not voluntary. Licensing requirements include required education or degrees, exams, apprenticeships, required experience or on-the-job training, and continuing education requirements.

These barrier and license totals were then tallied by state regulation and normalized on a 0 to 10 scale according to the formulas:

$$\text{Barrier Score} = \frac{\text{Total Barriers}_s - \text{Minimum Barriers}}{\text{Maximum Barriers} - \text{Minimum Barriers}} * 10$$

$$\text{License Score} = \frac{\text{Total Licenses}_s - \text{Minimum Licenses}}{\text{Maximum Licenses} - \text{Minimum Licenses}} * 10$$

Thus, a Barrier Score or License Score of 10 indicates that a state has the highest total barriers or highest total licenses in the index. Similarly, a score of 0 would indicate having the lowest total barriers or licenses in the index. Scores are rounded to the second decimal place.

We now provide more details on our scoring process. First, we determine the maximum barriers, maximum licenses, minimum barriers, and minimum licenses. These maximums and minimums are as follows: maximum barriers 212 (Arkansas), minimum barriers 147 (Kansas), maximum licenses 182 (Texas), minimum licenses 119 (Wyoming). Then, for each state, we use its total barriers count and total licenses count. For Alabama, total barriers are 206 and total licenses are 169. Thus, Alabama's scores are calculated as:

$$\text{Alabama's Barrier Score} = \frac{206 - 147}{212 - 147} * 10 = 9.09$$

$$\text{Alabama's License Score} = \frac{169 - 119}{182 - 119} * 10 = 7.74$$

States' overall ranks are determined by both the Barrier and License Scores. First, states are ranked according to Barrier Score. We then resolve any ties in barrier score using the rank for License Score. If two states have the same Barrier Scores but differing License Scores, the state with a higher License Score is ranked higher on the index. Having a higher Barrier score is unambiguously worse in terms of access to the labor market. More licenses, or a higher License Score, has both pros and cons. Coming back to the example of acupuncturists, the fact that South Carolina licenses the profession means that there is an alternative pathway to do the job besides the more onerous pathway of becoming a physician. At the same time, a new license represents a new burden and will create costs and additional bureaucracy for aspiring acupuncturists in the state.

Using this methodology for ranking leads to one instance of a tie in our overall ranking. Massachusetts and California are tied at 11th overall. As a result of this equal ranking, there is no 12th place overall in our ranking. **Table 2** contains the list of states by overall ranking.

Additionally, we compute the national average and regional averages for the nine Census divisions. The national average number of barriers per state according to our data set is 179, and the national average number of licenses per state is 150. These, as well as the regional averages, are summarized in **Table 3**.

The State Occupational Licensing Index also expands upon previous research by adding a new metric, Most Uniquely Licensed Occupation. This metric is determined by finding the occupation with the least barriers across all states that the state of analysis does have a barrier for. Some occupational titles are only barred in one state. This metric shows occupations that are generally not licensed but are licensed in the state being analyzed.

Finally, at the end of this report, we include individual profiles for each state.

HOW OUR DATABASE DIFFERS FROM EXISTING MEASURES

In developing this index, there are key differences between the occupation list of the Knee Center Database and the occupation lists used by License to Work publication and the National Council of State Legislatures (NCSL) National Occupational Licensing Database. License to Work 1, 2, and 3 focus on a list of 102 low- to medium-income occupations, specifically with License to Work 2 and 3 focusing on the same list, which differs slightly from License to Work 1. NCSL, on the other hand, focuses on 48 occupations across states with the specific requirement that the occupations be licensed in 30 or more states, not require more than a four-year degree, and have positive projected growth over the next decade. The Knee Center Occupational Database in some cases matches these two databases, but in other cases it does not.

Overall, 34 of the 102 occupations covered by License to Work 2 and 3 are included in this index. The others are not contained within the Knee Center Database. For some occupations, such as various contractors, the attainment of licensing is lower than coverage.⁸ While a license may exist for a specific occupation, it could be that an individual can do that occupation as long as they are working directly for a licensed individual. As a specific example, in License to Work 2 there is a note for Carpenter/Cabinet Maker Contractor: “Typically, only contractors require licenses, not the carpenters who work for them.” Thus, it is not illegal for an individual to work as a cabinet maker or carpenter. But all of the workers need to be supervised by a “contractor” who is licensed. This differs from an occupation such as electricians where each individual electrician is required to have a license. In constructing a house, a building company may only have one licensed Carpenter/Cabinet Maker Contractor on staff who participates and supervises multiple people doing carpentry, but every electrician on staff would be required to have their own individual license.

Turning to the NCSL National Occupational Licensing Database, the SOLI index matches 40 of the 48 occupations by title. Once more, there are some discrepancies with respect to the coverage of the two databases. **Table 4** contains the 53 occupations that are matched between the data for this index and the License to Work and NCSL National Occupational Licensing Database.

2023 STATE OCCUPATIONAL LICENSING INDEX

ALABAMA

U.S. RANK
3RD

BARRIER SCORE 9.08

(0=fewest barriers; 10=most barriers)

A barrier exists when the tasks associated with an occupational title are restricted by an occupational license to perform those tasks. The occupation itself may not have a specific license, but it is a crime to perform the associated tasks without meeting entry requirements.

LICENSE SCORE 7.94

(0=fewest licenses; 10=most licenses)

A licensing requirement is anything beyond a registration fee that is not voluntary for an occupational title. Licensing requirements include required education or degrees, exams, apprenticeships, experience or on-the-job training, and continuing education.

EAST SOUTH CENTRAL REGION

Alabama ranks 1st in the region. (1=worst; 4=best)

OVERALL U.S. RANKING

Alabama ranks 3rd overall. (1=worst; 51=best)

- 1 Arkansas
- 2 Texas
- 3 Alabama
- 4 Oklahoma
- 5 Washington

- Alabama
- Alaska
 - Arizona
 - Arkansas

 - Pennsylvania
 - Rhode Island
 - South Carolina
 - South Dakota
 - Tennessee
 - Texas
 - Utah
 - Vermont
 - Virginia
 - Washington
 - West Virginia
 - Wisconsin
 - Wyoming

KEY FINDINGS

Alabama has the 3rd highest licensing burden in the US and ranks 1st of four states in the East South Central region.

Alabama's total barriers (206) and licenses (169) are above the regional and national averages.

Within the East South Central region, Alabama has the most barriers and licensing requirements.

Alabama's most uniquely licensed occupations are Drama/Movement Therapist and Lead Abatement Contractor, which are licensed in two states.

ALASKA

U.S. RANK
44TH

BARRIER SCORE 2.31

(0=fewest barriers; 10=most barriers)

A barrier exists when the tasks associated with an occupational title are restricted by an occupational license to perform those tasks. The occupation itself may not have a specific license, but it is a crime to perform the associated tasks without meeting entry requirements.

LICENSE SCORE 1.27

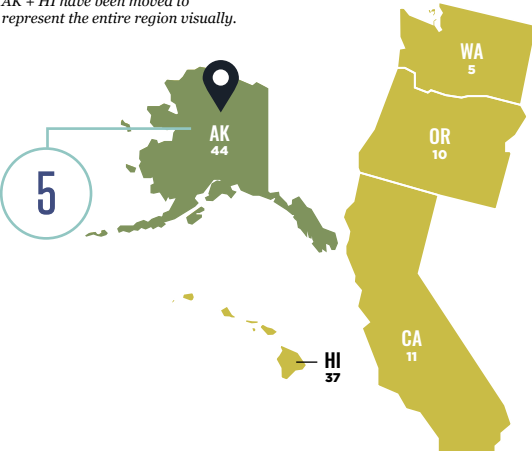

(0=fewest licenses; 10=most licenses)

A licensing requirement is anything beyond a registration fee that is not voluntary for an occupational title. Licensing requirements include required education or degrees, exams, apprenticeships, experience or on-the-job training, and continuing education.

PACIFIC REGION

Alaska ranks 5th in the region. (1=worst; 5=best)

AK + HI have been moved to represent the entire region visually.

OVERALL U.S. RANKING

Alaska ranks 44th overall. (1=worst; 51=best)

- 42 Nevada
- 43 Montana
- 44 Alaska
- 45 Illinois
- 46 Vermont

- Alabama
- Alaska
- Arizona
- Arkansas
- California

- Pennsylvania
- Rhode Island
- South Carolina
- South Dakota
- Tennessee
- Texas
- Utah
- Vermont
- Virginia
- Washington
- West Virginia
- Wisconsin
- Wyoming

KEY FINDINGS

Alaska has the 44th highest licensing burden in the US and ranks 5th of five states in the Pacific region.

Alaska's total barriers (162) and licenses (127) are below the regional and national averages.

Alaska ranks in the bottom quintile of states with the eighth fewest barriers and fourth fewest licenses.

Alaska's most uniquely licensed occupation is Commercial Industrial Plumber, which is licensed only in Alaska.

ARIZONA

U.S. RANK
31ST

BARRIER SCORE 4.31

(0=fewest barriers; 10=most barriers)

A barrier exists when the tasks associated with an occupational title are restricted by an occupational license to perform those tasks. The occupation itself may not have a specific license, but it is a crime to perform the associated tasks without meeting entry requirements.

LICENSE SCORE 4.29

(0=fewest licenses; 10=most licenses)

A licensing requirement is anything beyond a registration fee that is not voluntary for an occupational title. Licensing requirements include required education or degrees, exams, apprenticeships, experience or on-the-job training, and continuing education.

MOUNTAIN REGION

Arizona ranks 4th in the region. (1=worst; 8=best)

OVERALL U.S. RANKING

Arizona ranks 31st overall. (1=worst; 51=best)

- 29 New Mexico
- 30 Idaho
- 31 Arizona
- 32 Nevada
- 33 Montana

- Alabama
- Alaska
- Arizona
- Arkansas
- California
- Colorado
- Connecticut

- Oregon
- Pennsylvania
- Rhode Island
- South Carolina
- South Dakota
- Tennessee
- Texas
- Utah
- Vermont
- Virginia
- Washington
- West Virginia
- Wisconsin
- Wyoming

KEY FINDINGS

Arizona has the 31st highest licensing burden in the US and ranks 4th of eight states in the Mountain region.

Arizona's total barriers (175) and licenses (146) are above the regional average averages but below the national averages.

In 2019, Arizona passed a comprehensive universal licensing recognition law. The law does not recognize other states' licenses automatically; individuals must still apply for licenses, pay applicable fees, and meet requirements. However, it makes it easier to obtain a license by removing duplicate requirements such as education and training.

Arizona's most uniquely licensed occupation is Specialty Residential Contractor, which is licensed in two states.

ARKANSAS

U.S. RANK
1ST

BARRIER SCORE 10.0

(0=fewest barriers; 10=most barriers)

A barrier exists when the tasks associated with an occupational title are restricted by an occupational license to perform those tasks. The occupation itself may not have a specific license, but it is a crime to perform the associated tasks without meeting entry requirements.

LICENSE SCORE 9.68

(0=fewest licenses; 10=most licenses)

A licensing requirement is anything beyond a registration fee that is not voluntary for an occupational title. Licensing requirements include required education or degrees, exams, apprenticeships, experience or on-the-job training, and continuing education.

WEST SOUTH CENTRAL REGION

Arkansas ranks 1st in the region. (1=worst; 4=best)

OVERALL U.S. RANKING

Arkansas ranks 1st overall. (1=worst; 51=best)

- 1 Arkansas
- 2 Texas
- 3 Alabama
- 4 Oklahoma
- 5 Washington

- Alabama
- Alaska
- Arizona
- Arkansas
- California
- Colorado

- Oregon
- Pennsylvania
- Rhode Island
- South Carolina
- South Dakota
- Tennessee
- Texas
- Utah
- Vermont
- Virginia
- Washington
- West Virginia
- Wisconsin
- Wyoming

KEY FINDINGS

Arkansas has the highest (1st) licensing burden in the US and the West South Central region.

Arkansas's total barriers (212) and licenses (180) are significantly above the regional and national averages.

Arkansas has the most barriers and second most licenses of any state in the index.

Arkansas's most uniquely licensed occupations are Air Condition Electrician and Lead Abatement Contractor, which are licensed in two states.

CALIFORNIA

U.S. RANK
11TH

BARRIER SCORE 6.46

(0=fewest barriers; 10=most barriers)

A barrier exists when the tasks associated with an occupational title are restricted by an occupational license to perform those tasks. The occupation itself may not have a specific license, but it is a crime to perform the associated tasks without meeting entry requirements.

LICENSE SCORE 5.40

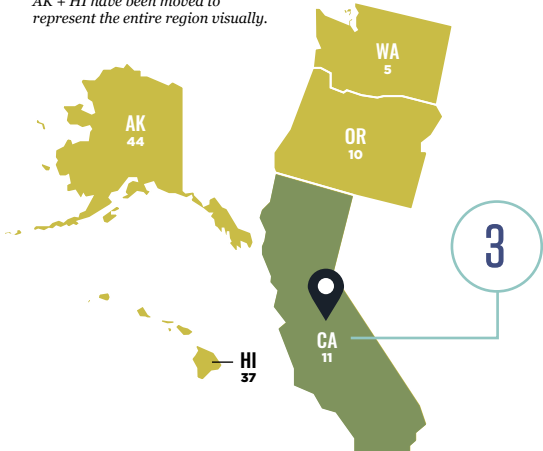

(0=fewest licenses; 10=most licenses)

A licensing requirement is anything beyond a registration fee that is not voluntary for an occupational title. Licensing requirements include required education or degrees, exams, apprenticeships, experience or on-the-job training, and continuing education.

PACIFIC REGION

California ranks 3rd in the region. (1=worst; 5=best)

AK + HI have been moved to represent the entire region visually.

OVERALL U.S. RANKING

California ranks 11th overall. (1=worst; 51=best)

- 9 Wisconsin
- 10 Oregon
- 11 California/Massachusetts
- 13 West Virginia
- 14 Virginia

- Alabama
- Alaska

- Oregon
- Pennsylvania
- Rhode Island
- South Carolina
- South Dakota
- Tennessee
- Texas
- Utah
- Vermont
- Virginia
- Washington
- West Virginia
- Wisconsin
- Wyoming

KEY FINDINGS

California is tied for the 11th highest licensing burden in the US and ranks 3rd of five states in the Pacific region.

California's total barriers (189) and licenses (153) are above the regional and national averages.

Although trending above the national averages, California ranks better than its regional peers Washington and Oregon.

California's most uniquely licensed occupation is Fire/Life/Safety Technician, which is licensed only in California.

COLORADO

U.S. RANK
47TH

BARRIER SCORE 1.08

(0=fewest barriers; 10=most barriers)

A barrier exists when the tasks associated with an occupational title are restricted by an occupational license to perform those tasks. The occupation itself may not have a specific license, but it is a crime to perform the associated tasks without meeting entry requirements.

LICENSE SCORE 1.11

(0=fewest licenses; 10=most licenses)

A licensing requirement is anything beyond a registration fee that is not voluntary for an occupational title. Licensing requirements include required education or degrees, exams, apprenticeships, experience or on-the-job training, and continuing education.

MOUNTAIN REGION

Colorado ranks 7th in the region. (1=worst; 8=best)

OVERALL U.S. RANKING

Colorado ranks 47th overall. (ranking: 1=worst; 51=best)

- 45 Illinois
- 46 Vermont
- 47 Colorado
- 48 Indiana
- 49 Wyoming

- Alabama
- Alaska
- Arizona
- Arkansas

- Pennsylvania
- Rhode Island
- South Carolina
- South Dakota
- Tennessee
- Texas
- Utah
- Vermont
- Virginia
- Washington
- West Virginia
- Wisconsin
- Wyoming

KEY FINDINGS

Colorado has the 47th highest licensing burden in the US and ranks 7th of eight states in the Mountain region.

Colorado's total barriers (154) and licenses (126) are significantly below the regional and national averages.

Within the Mountain region, Colorado has the second fewest barriers and licenses—above only Wyoming.

Colorado is the only state in the US that does not license funeral directors. Colorado's most uniquely licensed occupation, Rental Listing Referral Agent, isn't specifically licensed; it is barred by a Real Estate Broker license.

CONNECTICUT

U.S. RANK
30TH

BARRIER SCORE 4.77

(0=fewest barriers; 10=most barriers)

A barrier exists when the tasks associated with an occupational title are restricted by an occupational license to perform those tasks. The occupation itself may not have a specific license, but it is a crime to perform the associated tasks without meeting entry requirements.

LICENSE SCORE 4.13

(0=fewest licenses; 10=most licenses)

A licensing requirement is anything beyond a registration fee that is not voluntary for an occupational title. Licensing requirements include required education or degrees, exams, apprenticeships, experience or on-the-job training, and continuing education.

NEW ENGLAND REGION

Connecticut ranks 5th in the region. (1=worst; 6=best)

OVERALL U.S. RANKING

Connecticut ranks 30th overall. (1=worst; 51=best)

- 28 Idaho
- 29 Michigan
- 30 Connecticut

- Pennsylvania
- Rhode Island
- South Carolina
- South Dakota
- Tennessee
- Texas
- Utah
- Vermont
- Virginia
- Washington
- West Virginia
- Wisconsin
- Wyoming

KEY FINDINGS

Connecticut has the 27th highest licensing burden in the US and ranks 5th of six states in the New England region.

Connecticut's total barriers (178) and licenses (145) are consistent with the regional and national averages.

Although trending near the national averages, Connecticut has the second fewest barriers and licenses in the New England region—above only Vermont.

Connecticut's most uniquely licensed occupation is Lead Consultant Contractor, which is licensed only in Connecticut.

DELAWARE

U.S. RANK
34TH

BARRIER SCORE 4.00

(0=fewest barriers; 10=most barriers)

A barrier exists when the tasks associated with an occupational title are restricted by an occupational license to perform those tasks. The occupation itself may not have a specific license, but it is a crime to perform the associated tasks without meeting entry requirements.

LICENSE SCORE 3.49

(0=fewest licenses; 10=most licenses)

A licensing requirement is anything beyond a registration fee that is not voluntary for an occupational title. Licensing requirements include required education or degrees, exams, apprenticeships, experience or on-the-job training, and continuing education.

SOUTH ATLANTIC REGION

Delaware ranks 6th in the region.

(1=worst; 9=best)

OVERALL U.S. RANKING

- Pennsylvania
- Rhode Island
- South Carolina
- South Dakota
- Tennessee
- Texas
- Utah
- Vermont
- Virginia
- Washington
- West Virginia
- Wisconsin
- Wyoming

KEY FINDINGS

Delaware has the 34th highest licensing burden in the US and ranks 6th of nine states in the South Atlantic region.

Delaware's total barriers (173) and licenses (141) are below the regional and national averages.

While Delaware may be famous for its corporate laws, it places fewer than average barriers to entry through occupational licenses.

Delaware's most uniquely licensed occupation is Master HVACR, which is licensed in three states.

DISTRICT OF COLUMBIA

U.S. RANK
35TH

BARRIER SCORE 3.85

(0=fewest barriers; 10=most barriers)

A barrier exists when the tasks associated with an occupational title are restricted by an occupational license to perform those tasks. The occupation itself may not have a specific license, but it is a crime to perform the associated tasks without meeting entry requirements.

LICENSE SCORE 2.38

(0=fewest licenses; 10=most licenses)

A licensing requirement is anything beyond a registration fee that is not voluntary for an occupational title. Licensing requirements include required education or degrees, exams, apprenticeships, experience or on-the-job training, and continuing education.

SOUTH ATLANTIC REGION

District of Columbia ranks 7th in the region.

(1=worst; 9=best)

OVERALL U.S. RANKING

District of Columbia ranks 35th overall. (1=worst; 51=best)

- Utah
- Vermont
- Virginia
- Washington
- West Virginia
- Wisconsin
- Wyoming

The District of Columbia has the 35th highest licensing burden in the US and ranks 7th of nine states in the South Atlantic region.

The District of Columbia's total barriers (172) and licenses (134) are below the regional and national averages.

The nation's capital is less restrictive than the median state and is only outperformed by Florida and Maryland in the South Atlantic region.

The District of Columbia's most uniquely licensed occupation is Dance/Movement Therapist, which is licensed in three states.

FLORIDA

U.S. RANK
36TH

BARRIER SCORE 3.54

(0=fewest barriers; 10=most barriers)

A barrier exists when the tasks associated with an occupational title are restricted by an occupational license to perform those tasks. The occupation itself may not have a specific license, but it is a crime to perform the associated tasks without meeting entry requirements.

LICENSE SCORE 4.92

(0=fewest licenses; 10=most licenses)

A licensing requirement is anything beyond a registration fee that is not voluntary for an occupational title. Licensing requirements include required education or degrees, exams, apprenticeships, experience or on-the-job training, and continuing education.

SOUTH ATLANTIC REGION

Florida ranks 8th in the region. (1=worst; 9=best)

OVERALL U.S. RANKING

Florida ranks 36th overall. (1=worst; 51=best)

- 34 Delaware
- 35 District of Columbia

- Virginia
- Washington
- West Virginia
- Wisconsin
- Wyoming

KEY FINDINGS

Florida has the 36th highest licensing burden in the US and ranks 8th of nine states in the South Atlantic region.

Florida's total barriers (170) are below the regional and national averages; its total licenses (150) are consistent with the regional and national averages.

The states surrounding Florida—Washington, DC (#35) and Hawaii (#37)—have a similar number of barriers but each have more than 10 fewer licenses.

Florida's most uniquely licensed occupations are Gas Line Contractor and Orthotic Fitter Assistant, which are licensed only in Florida.

GEORGIA

U.S. RANK
32ND

BARRIER SCORE 4.15

(0=fewest barriers; 10=most barriers)

A barrier exists when the tasks associated with an occupational title are restricted by an occupational license to perform those tasks. The occupation itself may not have a specific license, but it is a crime to perform the associated tasks without meeting entry requirements.

LICENSE SCORE 3.65

(0=fewest licenses; 10=most licenses)

A licensing requirement is anything beyond a registration fee that is not voluntary for an occupational title. Licensing requirements include required education or degrees, exams, apprenticeships, experience or on-the-job training, and continuing education.

SOUTH ATLANTIC REGION

Georgia ranks 5th in the region. (1=worst; 9=best)

OVERALL U.S. RANKING

Georgia ranks 32nd overall. (1=worst; 51=best)

KEY FINDINGS

Georgia has the 32nd highest licensing burden in the US and ranks 5th of nine states in the South Atlantic region.

Georgia's total barriers (174) and licenses (142) are slightly below the regional and national averages.

Georgia's lactation consultant law is uniquely restrictive, requiring approximately two years of college and 300 hours of clinical work. The law was ruled unconstitutional and is under review by the Georgia Supreme Court.

Georgia's most uniquely licensed occupation is Lactation Consultant, which is licensed in four states.

HAWAII

U.S. RANK
37TH

BARRIER SCORE 3.38

(0=fewest barriers; 10=most barriers)

A barrier exists when the tasks associated with an occupational title are restricted by an occupational license to perform those tasks. The occupation itself may not have a specific license, but it is a crime to perform the associated tasks without meeting entry requirements.

LICENSE SCORE 3.02

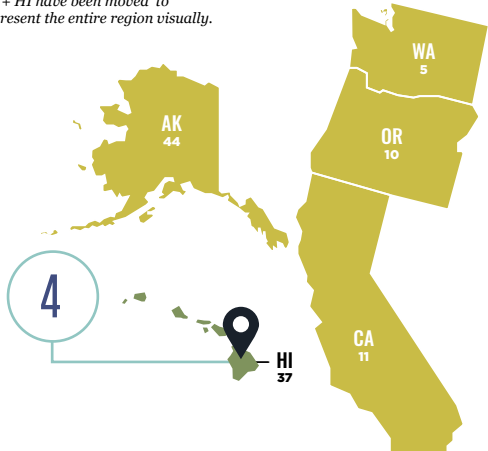

(0=fewest licenses; 10=most licenses)

A licensing requirement is anything beyond a registration fee that is not voluntary for an occupational title. Licensing requirements include required education or degrees, exams, apprenticeships, experience or on-the-job training, and continuing education.

PACIFIC REGION

Hawaii ranks 4th in the region. (1=worst; 5=best)

KEY FINDINGS

Idaho has the 28th highest licensing burden in the US and ranks 3rd of eight states in the Mountain region.

Idaho's total barriers (178) and licenses (146) are slightly above the regional averages and slightly below the national averages.

Although trending near the national averages, Idaho has higher barriers and licenses than most states in the Mountain region.

Idaho's most uniquely licensed occupations are Backflow Prevention Tester, Landscape Architect In-Training/Trainee/Intern, and Lineman, which are licensed in five states.

ILLINOIS

U.S. RANK
45TH

BARRIER SCORE 2.15

(0=fewest barriers; 10=most barriers)

A barrier exists when the tasks associated with an occupational title are restricted by an occupational license to perform those tasks. The occupation itself may not have a specific license, but it is a crime to perform the associated tasks without meeting entry requirements.

LICENSE SCORE 4.13

(0=fewest licenses; 10=most licenses)

A licensing requirement is anything beyond a registration fee that is not voluntary for an occupational title. Licensing requirements include required education or degrees, exams, apprenticeships, experience or on-the-job training, and continuing education.

EAST NORTH CENTRAL REGION

Illinois ranks 4th in the region. (1=worst; 5=best)

KEY FINDINGS

Illinois has the 45th highest licensing burden in the US and ranks 4th of five states in the East North Central region.

Illinois's total barriers (161) and licenses (145) are below the regional and national averages. Illinois is among a specific set of states with much different barrier and license scores.

Within the East North Central region, Illinois has the second fewest barriers and licenses—above only Indiana.

Illinois's most uniquely licensed occupations are Naprapathic Physician⁹ and Subsurface Sewage Cleaner, which are licensed in three states.

INDIANA

U.S. RANK
48TH

BARRIER SCORE 0.92

(0=fewest barriers; 10=most barriers)

A barrier exists when the tasks associated with an occupational title are restricted by an occupational license to perform those tasks. The occupation itself may not have a specific license, but it is a crime to perform the associated tasks without meeting entry requirements.

LICENSE SCORE 3.02

(0=fewest licenses; 10=most licenses)

A licensing requirement is anything beyond a registration fee that is not voluntary for an occupational title. Licensing requirements include required education or degrees, exams, apprenticeships, experience or on-the-job training, and continuing education.

KEY FINDINGS

Indiana has the 48th highest licensing burden in the US and ranks 5th of five states in the East North Central region.

Indiana's total barriers (153) and licenses (138) are significantly below the regional and national averages.

Within the East North Central region, Indiana has the fewest barriers and licenses. In fact, it has only six more barriers than the best-ranked state in the index, Kansas.

Indiana's most uniquely licensed occupation is Backflow Prevention Tester, which is licensed in five states.

BARRIER SCORE 5.08

(0=fewest barriers; 10=most barriers)

A barrier exists when the tasks associated with an occupational title are restricted by an occupational license to perform those tasks. The occupation itself may not have a specific license, but it is a crime to perform the associated tasks without meeting entry requirements.

LICENSE SCORE 4.92

(0=fewest licenses; 10=most licenses)

A licensing requirement is anything beyond a registration fee that is not voluntary for an occupational title. Licensing requirements include required education or degrees, exams, apprenticeships, experience or on-the-job training, and continuing education.

- Wyoming

KEY FINDINGS

Kentucky has the 6th highest licensing burden in the US and ranks 2nd of four states in the East South Central region.

Kentucky's total barriers (197) and licenses (163) are above the regional and national averages.

Kentucky has the same number of barriers as Washington; however, Kentucky has fewer overall licenses, allowing it to fall one place lower on the index.

Kentucky's most uniquely licensed occupations are Cemetery Broker (licensed as Cemetery Salesperson) and Orthotic Fitter, which are licensed in six states.

LOUISIANA

U.S. RANK
33RD

BARRIER SCORE 4.0

(0=fewest barriers; 10=most barriers)

A barrier exists when the tasks associated with an occupational title are restricted by an occupational license to perform those tasks. The occupation itself may not have a specific license, but it is a crime to perform the associated tasks without meeting entry requirements.

LICENSE SCORE 5.71

(0=fewest licenses; 10=most licenses)

A licensing requirement is anything beyond a registration fee that is not voluntary for an occupational title. Licensing requirements include required education or degrees, exams, apprenticeships, experience or on-the-job training, and continuing education.

KEY FINDINGS

Montana has the 43rd highest licensing burden in the US and ranks 6th of eight states in the Mountain region.

Montana's total barriers (163) and licenses (133) are below the regional and national averages.

Although it ranks in the bottom quintile of the index, Montana has only the third lowest barriers and licenses in the Mountain region—above Wyoming and Colorado.

Montana's most uniquely licensed occupation is Crane Operator, which is licensed in 13 states.

NEBRASKA

U.S. RANK
22ND

BARRIER SCORE 5.69

(0=fewest barriers; 10=most barriers)

A barrier exists when the tasks associated with an occupational title are restricted by an occupational license to perform those tasks. The occupation itself may not have a specific license, but it is a crime to perform the associated tasks without meeting entry requirements.

LICENSE SCORE 5.56

(0=fewest licenses; 10=most licenses)

A licensing requirement is anything beyond a registration fee that is not voluntary for an occupational title. Licensing requirements include required education or degrees, exams, apprenticeships, experience or on-the-job training, and continuing education.

WEST NORTH CENTRAL REGION

Nebraska ranks 3rd in the region. (1=worst; 7=best)

KEY FINDINGS

South Carolina has the 27th highest licensing burden in the US and ranks 4th of nine states in the South Atlantic region.

South Carolina's total barriers (178) are consistent with the regional and national averages; its total licenses (159) are above the regional and national averages.

Near the index median, South Carolina has one less barrier than the national average, but it has nine more licensing requirements.

South Carolina's most uniquely licensed occupation is Specialty Residential Contractor, which is licensed in two states.

SOUTH DAKOTA

U.S. RANK
39TH

BARRIER SCORE 3.08

(0=fewest barriers; 10=most barriers)

A barrier exists when the tasks associated with an occupational title are restricted by an occupational license to perform those tasks. The occupation itself may not have a specific license, but it is a crime to perform the associated tasks without meeting entry requirements.

LICENSE SCORE 3.02

(0=fewest licenses; 10=most licenses)

A licensing requirement is anything beyond a registration fee that is not voluntary for an occupational title. Licensing requirements include required education or degrees, exams, apprenticeships, experience or on-the-job training, and continuing education.

WEST NORTH CENTRAL REGION

South Dakota ranks 5th in the region. (1=worst; 7=best)

OVERALL U.S. RANKING

KEY FINDINGS

South Dakota has the 39th highest licensing burden in the US and ranks 5th of seven states in the West North Central region.

South Dakota's total barriers (167) and licenses (138) are significantly below the regional and national averages.

Within the West North Central region, South Dakota has the third fewest barriers and the second fewest licensing requirements.

South Dakota's most uniquely licensed occupation is Land Abstractor, which is licensed in five states.

TENNESSEE

U.S. RANK
17TH

BARRIER SCORE **6.00**

(0=fewest barriers; 10=most barriers)

A barrier exists when the tasks associated with an occupational title are restricted by an occupational license to perform those tasks. The occupation itself may not have a specific license, but it is a crime to perform the associated tasks without meeting entry requirements.

LICENSE SCORE **7.46**

(0=fewest licenses; 10=most licenses)

A licensing requirement is anything beyond a registration fee that is not voluntary for an occupational title. Licensing requirements include required education or degrees, exams, apprenticeships, experience or on-the-job training, and continuing education.

EAST SOUTH CENTRAL REGION

Tennessee ranks 3rd in the region. (1=worst; 4=best)

OVERALL U.S. RANKING

Tennessee ranks 17th overall. (1=worst; 51=best)

- Oregon
- Pennsylvania
- Rhode Island
- South Carolina
- South Dakota

KEY FINDINGS

Tennessee has the 17th highest licensing burden in the US and ranks 3rd of four states in the East South Central region.

Tennessee's total barriers (186) are above the national average but slightly below the regional average; its total licenses (166) are above the regional and national averages.

Although trending above the national averages, Tennessee ranks better than its regional peers Kentucky and Alabama.

Tennessee's most uniquely licensed occupation is Lighting-Protection Contractor, which is licensed only in Tennessee.

TEXAS

U.S. RANK
2ND

BARRIER SCORE 9.23

(0=fewest barriers; 10=most barriers)

A barrier exists when the tasks associated with an occupational title are restricted by an occupational license to perform those tasks. The occupation itself may not have a specific license, but it is a crime to perform the associated tasks without meeting entry requirements.

LICENSE SCORE 10.00

(0=fewest licenses; 10=most licenses)

A licensing requirement is anything beyond a registration fee that is not voluntary for an occupational title. Licensing requirements include required education or degrees, exams, apprenticeships, experience or on-the-job training, and continuing education.

WEST SOUTH CENTRAL REGION

Texas ranks 2nd in the region. (1=worst; 4=best)

OVERALL U.S. RANKING

Texas ranks 2nd overall. (1=worst; 51=best)

- Washington
- West Virginia
- Wisconsin
- Wyoming

KEY FINDINGS

Texas has the 2nd highest licensing burden in the US and ranks 2nd of four states in the West South Central region—falling just below Arkansas on both measures.

Texas’s total barriers (207) and licenses (182) are significantly above the regional and national averages.

Texas has the second most barriers and the most licenses of any state in the index.

Texas’s most uniquely licensed occupation is Electrical Sign Apprentice, which is licensed only in Texas.

UTAH

U.S. RANK
15TH

BARRIER SCORE 6.15

(0=fewest barriers; 10=most barriers)

A barrier exists when the tasks associated with an occupational title are restricted by an occupational license to perform those tasks. The occupation itself may not have a specific license, but it is a crime to perform the associated tasks without meeting entry requirements.

LICENSE SCORE 5.56

(0=fewest licenses; 10=most licenses)

A licensing requirement is anything beyond a registration fee that is not voluntary for an occupational title. Licensing requirements include required education or degrees, exams, apprenticeships, experience or on-the-job training, and continuing education.

KEY FINDINGS

Utah has the 15th highest licensing burden in the US and ranks 1st of eight states in the Mountain region.

Utah's total barriers (187) and licenses (154) are significantly above the regional and national averages.

Within the Mountain region, Utah has the most barriers and licensing requirements.

Utah's most uniquely licensed occupation is Mortgage Banker, which is licensed in nine states.

VERMONT

U.S. RANK
46TH

BARRIER SCORE 1.85

(0=fewest barriers; 10=most barriers)

A barrier exists when the tasks associated with an occupational title are restricted by an occupational license to perform those tasks. The occupation itself may not have a specific license, but it is a crime to perform the associated tasks without meeting entry requirements.

LICENSE SCORE 1.27

(0=fewest licenses; 10=most licenses)

A licensing requirement is anything beyond a registration fee that is not voluntary for an occupational title. Licensing requirements include required education or degrees, exams, apprenticeships, experience or on-the-job training, and continuing education.

NEW ENGLAND REGION

Vermont ranks 6th in the region. (1=worst; 6=best)

OVERALL U.S. RANKING

- Texas
- Utah
- Vermont
- Virginia
- Washington
- West Virginia
- Wisconsin
- Wyoming

KEY FINDINGS

Vermont has the 46th highest licensing burden in the US and ranks 6th of six states in the New England region.

Vermont's total barriers (159) and licenses (127) are significantly below the regional and national averages.

Within the New England region, Vermont has the fewest barriers and licenses; it has the lowest ranking by a significant margin.

Vermont's most uniquely licensed occupation is Dental Therapist, which is licensed in three states.

VIRGINIA

U.S. RANK
14TH

BARRIER SCORE 6.46

(0=fewest barriers; 10=most barriers)

A barrier exists when the tasks associated with an occupational title are restricted by an occupational license to perform those tasks. The occupation itself may not have a specific license, but it is a crime to perform the associated tasks without meeting entry requirements.

LICENSE SCORE 5.24

(0=fewest licenses; 10=most licenses)

A licensing requirement is anything beyond a registration fee that is not voluntary for an occupational title. Licensing requirements include required education or degrees, exams, apprenticeships, experience or on-the-job training, and continuing education.

SOUTH ATLANTIC REGION

Virginia ranks 3rd in the region. (1=worst; 9=best)

OVERALL U.S. RANKING

Virginia ranks 14th overall. (1=worst; 51=best)

- 11 California/Massachusetts
- 13 West Virginia
- 14 Virginia
- 15 Utah
- 16 Rhode Island

KEY FINDINGS

Virginia has the 14th highest licensing burden in the US and ranks 3rd of nine states in the South Atlantic region.

Virginia's total barriers (189) and licenses (152) are above the regional and national averages.

Although trending above the national averages, Virginia ranks better than its regional peers West Virginia and North Carolina.

Virginia's most uniquely licensed occupation is Journeyman Gas Fitter, which is licensed in eight states.

- Alabama
- Alaska
- Arizona
- Arkansas
- California
- Colorado
- Connecticut
- Delaware
- District of Columbia
- Florida
- Georgia
- Hawaii

WASHINGTON

U.S. RANK
5TH

BARRIER SCORE 7.69

(0=fewest barriers; 10=most barriers)

A barrier exists when the tasks associated with an occupational title are restricted by an occupational license to perform those tasks. The occupation itself may not have a specific license, but it is a crime to perform the associated tasks without meeting entry requirements.

LICENSE SCORE 7.30

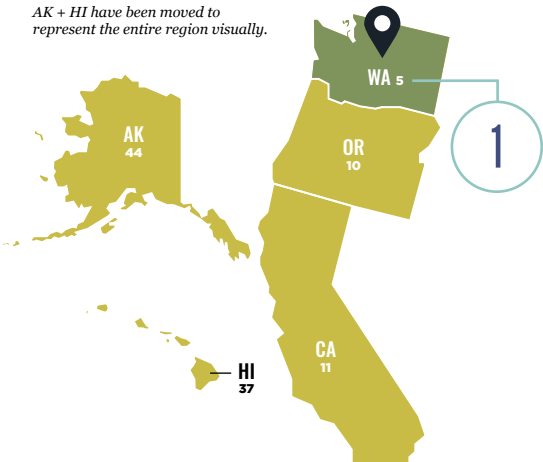

(0=fewest licenses; 10=most licenses)

A licensing requirement is anything beyond a registration fee that is not voluntary for an occupational title. Licensing requirements include required education or degrees, exams, apprenticeships, experience or on-the-job training, and continuing education.

PACIFIC REGION

Washington ranks 1st in the region. (1=worst; 5=best)

AK + HI have been moved to represent the entire region visually.

OVERALL U.S. RANKING

Washington ranks 5th overall. (1=worst; 51=best)

- 3 Alabama
- 4 Oklahoma
- 5 Washington
- 6 Kentucky
- 7 Minnesota

KEY FINDINGS

Washington has the 5th highest licensing burden in the US and ranks 1st of five states in the Pacific region.

Washington's total barriers (197) and licenses (165) are significantly above the regional and national averages.

Within the Pacific region, Washington has the most barriers and the second most licensing requirements.

Washington's most uniquely licensed occupation is Ocularist, which is licensed in two states.¹²

- Texas
- Utah
- Vermont
- Virginia
- Washington
- West Virginia
- Wisconsin
- Wyoming

KEY FINDINGS

Wyoming has the 49th highest licensing burden in the US and ranks 8th of eight states in the Mountain region.

Wyoming's total barriers (152) and licenses (119) are significantly below the regional and national averages.

Wyoming has the fewest licenses and the third fewest barriers of any state in the index, making it the best ranked state in the Mountain region.

Wyoming's most uniquely licensed occupation is Electrical Technical (licensed as Low-Voltage Technician or Limited Technician), which is licensed in two states.

APPENDIX

Readers and researchers may be curious how the State Occupational Licensing Index (SOLI) compares to other rankings of occupational licensing. **Table A1** compares the rankings of this index to the rankings in *License to Work 3* and the Occupational Freedom Score found in *Freedom in the 50 States*.

There are instances in which the SOLI matches closely to either *License to Work* or the Occupational Freedom Score and instances in which it differs drastically. There is only occasional consistency between any two of the three rankings. Differences in rankings can be explained by important methodology differences for each index. This index ranks based on a simple count of barriers known through the Knee Center Database. *License to Work*, on the other hand, focuses exclusively on low- and moderate-income occupations. Finally, *Freedom in the 50 States* uses a weighted sum based on 64 occupations and their proportion of total employment. As noted earlier in the report, the SOLI uses the most occupations of the three rankings.

TABLE A1 | COMPARISONS

ABOUT THE AUTHORS

NOAH TRUDEAU, PHD, is an assistant professor of economics in the Shields School of Business at Saint Francis University. He is also a research affiliate with the Knee Center for the Study of Occupational Regulation at West Virginia University. His research specializes in occupational regulation, with a specific focus on the intersection of economic history and the study of barriers created through regulatory action. He earned his Ph.D. in economics from West Virginia University.

EDWARD TIMMONS, PHD, is a service associate professor of economics and director of the Knee Center for the Study of Occupational Regulation at West Virginia University. He is also a senior research fellow with the Archbridge Institute. His research has been published in scholarly journals including *The Journal of Law and Economics*, *The Journal of Regulatory Economics*, *The Journal of Labor Research*, *The British Journal of Industrial Relations*, *Health Policy*, *Monthly Labor Review*, and *Nicotine and Tobacco Research*. His research has been cited by the popular press, the Federal Trade Commission, the Obama White House, and in a U.S. Senate hearing entitled “License to Compete: Occupational Licensing and the State Action Doctrine.” He is regularly asked to provide expert testimony in state legislatures across the U.S. on occupational licensing reform and the practice authority of nurse practitioners. His work is heavily cited by the popular press, and he has authored numerous articles for media publications. He completed his Ph.D. in economics at Lehigh University.

LIFTING BARRIERS. LIFTING LIVES.

Increasing opportunities for social mobility and human flourishing is the defining challenge of our time. Through rigorous academic research, sound public policy solutions, and reviving the spirit of entrepreneurship, the Archbridge Institute works to empower individuals to achieve better, richer, and fuller lives by identifying and removing the barriers that constrain their potential. The Archbridge Institute is a non-partisan, independent, 501(c)(3) public policy think tank.
